

Aquaculture

FISHFORM® PLUS

The alternative for high-quality fish meal.

The supply of huge volumes of high quality fish meal is necessary to supply the rapid growing aquaculture industry, which is growing with nearly 10% annually since the 1950ies (FAO). The amount of high quality fish meal of the total amount of fish meal is expected to grow from 8% to 50% during the next 30 years.

In order to fulfil such challenging demands ADDCON has developed a preservative of raw fish for fish meal production – **FISHFORM® PLUS**

FISHFORM® PLUS is the effective solution for:

- longer catch/storage periods
- high quality fish meal
- strong antimicrobial effects
- optimal availability of nutrients

Preservation for fisheries and aquaculture!

• high quality fish meal

• longer storage

• strong antimicrobial effects

• optimal digestibility

FISHFORM PLUS is safe and sustainable and has no residues!
 It is patented and contains EU-approved ingredients (E 237a).

Technical Data

Dosages:

depending on storage conditions of raw fish (temperature, time) – see dosage table

Storage and shelf life:

FISHFORM PLUS is stored in 1000 litre IBC with a 36 months shelf-life

Trial proven effects in Sardine storage (time in days till TVN-level):

TVN-level	0 % FISHFORM	0.25 % FISHFORM	0.50 % FISHFORM	0.75 % FISHFORM
40 mg	3.2	4.5	6.0	10.4
60 mg	4.6	6.0	11.2	24.7

- Overall storage period in the groups with FISHFORM PLUS was significantly increased!
- The 0.75 % application of FISHFORM PLUS into the raw fish (sardine) lead to a 3-fold increase of possible storage time.
- Furthermore, additional data also indicate that fishmeal treated with FISHFORM PLUS increases the performance of fish.
